

Pl@ntVisor
Embedded

...ready to go!

Need PlantVisor to monitor your installation, but you don't have time to choose the right PC to run it on, buy the modem and configure the program? Well, the solution is **PlantVisor Embedded!**

PlantVisor Embedded is the new CAREL solution that ensures the simple and rapid installation of a monitoring and telemaintenance system for all CAREL instruments.

PlantVisor Embedded includes a complete pre-configured version of PlantVisor Enhanced Local running on dedicated hardware, and features all the communication ports required to best exploit its Web Server and installation monitoring functions:

- built-in fax/modem to communicate via e-mail, fax, SMS, Microsoft® Internet Explorer, PlantVisor remote;
- built-in Ethernet™ port for LAN – WAN – Internet connection;
- serial port for PCGate, supplied, used for communication to the instruments;
- USB/parallel port for printers

PlantVisor Embedded can be used as a local system with mouse, keyboard and monitor, or as a monitoring system accessed solely from a remote workstation via modem or network.

PlantVisor Embedded is available in the same languages used with **PlantVisor Enhanced**, that is, Italian, English, German, French, Spanish, Portuguese, Swedish, Czech, Greek and Russian (*).

(* check availability of the language when purchasing.

(**) the 15" touch screen monitor PVSTDMBLM0, complete with wall-mounting brackets, can be purchased separately. It ensures an excellent display of the data and alarm logs and the graphs created using PlantVisor Enhanced.

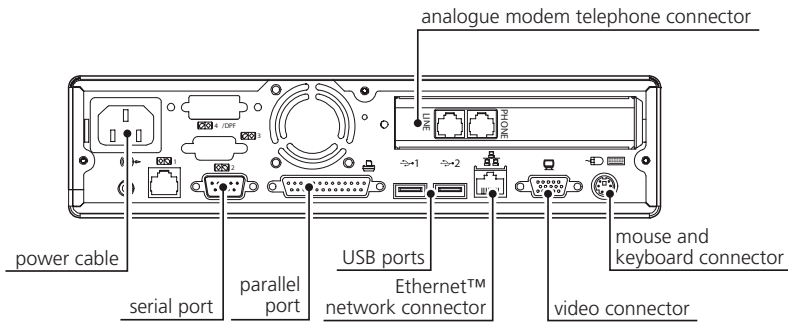

(**) display touch screen 15" opzionale

Kit PlantVisor Embedded

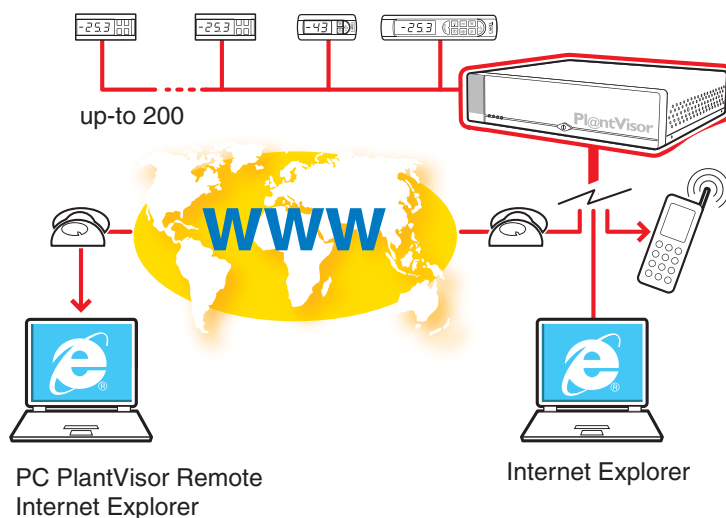

Connections:

Technical specifications:

Power supply 230 Vac
 Dimensions 26 x 24 x 6.2 cm
 RS232 serial port for PCGate (to CAREL instruments)
